

Kitty Grass Tips and Product Info

It's not just for Kitties anymore!

GOT Grass?

Priscilla's kitty grass is a special blend of oats, wheat, rye and a large serving of barley. Barley is the most tender, sweetest and easiest to digest of all the grains. Young barley grass contains the most protein of all the grains.

Wheat grass alone is generally used as a colonic and is far too rich for most animals to digest.

Our unique blend provides your pet with a tasty source of vitamins and nutrients including: calcium, magnesium, phosphorous and potassium. The high chlorophyll content also helps to keep blood cells, kidneys and glands filtered to ensure your pet's circulatory system. All of this helps to offset the environmental impurities that your pets are exposed to on a daily basis and will aid them in living a healthier life.

1 oz. of "Priscilla's Kitty Grass" juice contains the same nutritional value of 10 helpings of fresh vegetables.

For more Grass - health-related benefits see www.healthy.net

Originally developed almost a decade ago for Priscilla's own feline, it has since become very popular with a wide range of pets including dogs, rodents, reptiles, birds and other small pets. This special, "low-cal" blend of grains promotes a naturally maintained and well-balanced digestive system for your pet. **Did you know** that most plants and grasses found outdoors are far too tough and unclean? **Or** the large number of indoor houseplants and flowers that are considered deadly poisonous to your pet? PR's blend is safe, clean and 100% natural.

A Natural Process

The grains we use are re-cleaned and the entire process is performed outdoors in the natural coastal sunshine. Most commercial wheat grass is grown in hothouses in order to quicken the growth process, which can be detrimental to the longevity of the plant.

All of Priscilla's products are grown and packaged in the fresh coastal air of Southern California.

How to Care for Your Grass

Each 4" x 4" container of grass will last anywhere from 1 to 3 weeks. "Fresh is Best" for full nutritional benefits. Like all living plants, the grass needs water and natural light to grow. To extend the life of the grass it can be transplanted into a larger pot with more soil, and/or refrigerated when not in use. The best way to water is to run the water through the container once a day, or more if necessary. If kept refrigerated, water the grass less often. **DO NOT** let the grass sit in standing water as this can cause mold.

How to serve it Up

& Who to Feed it to!

Most animals take to our kitty grass right away. Sometimes a finicky kitty will need a little encouragement. The best thing to do is to place the container by the kitty's food and spritz it with water. They will lick off the water and realize it is something good to eat.

CATS

They love it and it will help them with fur balls and digestion. If our Kitty Grass is a consistent part of their diet, they won't have those nasty fur balls!

DOGS

Doggies will benefit with digestion aid as well. The grass will help to balance their system. Trim the grass and put it in with their food or give it to them as a treat from your hand. Your dog may also enjoy it right from the pot.

BIRDS

These feathered companions have become the second biggest user of our Grass. They like to play in it, eat it and use it for nesting. A big pile of trimmings will allow for quite a show, as some birds will use the grass as a way to clean their feathers.

RABBITS

Rabbits go crazy for it!! They will eat it down to the nub. It's best to cut it for them, or leave the container in with them for short periods of time. Otherwise they'll eat too much too fast.

REPTILES

They like to crawl through it, eat it and dig through it. They will enjoy laying in it as well. It's best to trim the greens into a bowl to serve.

GUINEA PIGS

They squeak when they smell it, and will thank you for the treat. So will most other small animals.

Other Special Treats, Toys and Gifts for You & Your Kitty

Grow Your Own Pet Treat!

It's easy! You don't have to have a green thumb to grow Priscilla's kitty grass. We offer a Grow Kit that comes with everything you need to grow your own pet treat in the comfort of your own home.

Priscilla's also offers a seed pack. The amount of seeds in each packet is equal to 3X's the amount used in each living container of Kitty Grass. Planting directions are on the back of each packet.

Allow 3-7 days for seeds to sprout, (longer in colder climates). The grass will be ready for your pet to eat when each sprout reaches a few inches, 10-14 days typically. Before sprouting, the seeds should be kept damp, but never soaked. Once sprouts appear, water less. The grass can be kept indoors or out for your pet to graze on.

Priscilla's also offers a Grow Your Own Catnip Kit, and this too comes with everything you need to grow.

Catnip tea, a.k.a. Nature's 'Alka-Seltzer' was brought over by the colonists and used as a relaxation and tummy settling tea for centuries.

Catnip is an herb from the mint family and naturally stimulates most adult cats. Your cat can eat it, lick it and roll around in it. It can instigate exercise in cats and it has a natural calming effect in people.

Priscilla's catnip, both regular and tea grade, is by far the Best around!

The Best Catnip Goodies Around

Catnip plants have a tremendous variance in the pungency of their scent. Because the essential oils are what the cats respond to, there will be a vast difference in catnip derived from various sources. Most sources do not have access to fresh or properly stored catnip herb.

At Priscilla's we use only the flowers and leaves of the catnip plant - this is the most pungent part of the plant. It is always strongest when naturally slow-dried.

At Priscilla's we also offer a variety of toys, gifts and blankets that compliment our fancy catnips.

Refillable Catnip Pillow Blanket

Super-soft polar fleece with a pillow that can be refilled with our leaves and flowers.

Davenport Catnip Pillow Toy

Designed exclusively for Priscilla's by renowned artist Barbara Davenport, each is filled with our ultra-potent tea grade AAA fancy catnip. Collect all three designs.

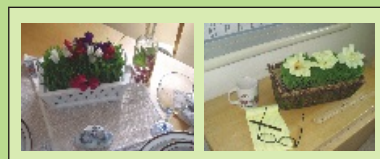

Refillable Catnip Toy

Filled with our fancy grade, AAA, 100% organic catnip tea. Simply refill the toy once the aroma wears off. Available in a variety of colors and patterns.

Create a Home Grown Design

Priscilla's Kitty Grass can also add a Natural Feel to any Center Piece or Floral Arrangement. Even on a rainy day, it's easy to design your own private garden.

Priscilla's offering of decorative planters and floral picks add charm or whimsy to any room in the house whether the style is contemporary, rustic, cottage or Victorian.

Priscilla's now offers special order Gift Baskets, Purr-fect for any occasion or budget.

Our special order gift baskets are **Made To Order Gift Baskets**. You select the items, styles and colors, indicate the basket or planter type; we'll do the rest.
